**(54) PRESERVATION OF FOOD AND PRESERVING
MATERIAL**

(57) Abstract:

PURPOSE: To preserve foods safely without lowering their freshness, by packing the foods into a material impregnated with L-ascorbic acid and a ferrous compound, or storing them in it.

CONSTITUTION: A solution containing at least one ferrous compound selected from ferrous sulfate, ferrous chloride, and ferrous nitrate and 2W30wt% L- ascorbic acid based on the ferrous compound is impregnated into a base material such as thin paper, Kraft paper, corrugated board, cloth, nonwoven fabric, etc., and foods are packed into the base material or stored in it.
